Recording and Editing with Digital Media

▶ **Basic Techniques:**

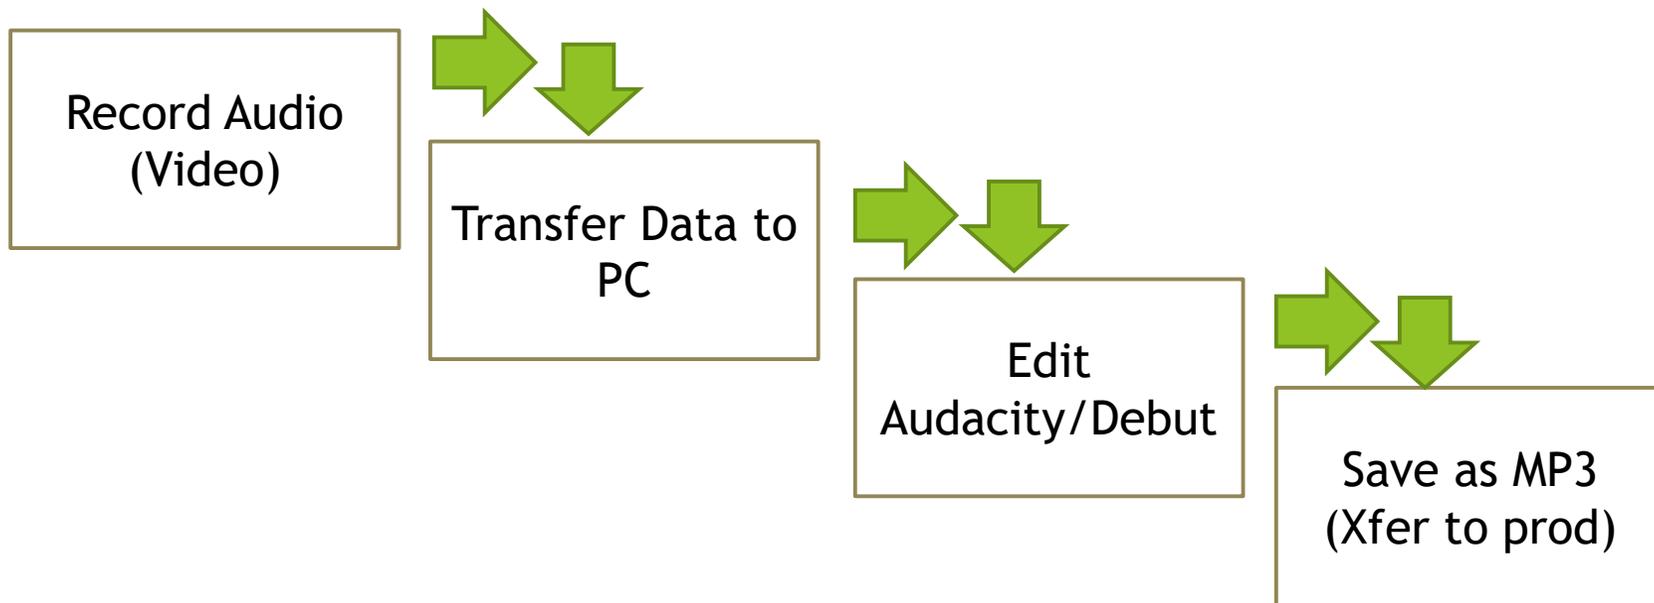

- ▶ Record
- ▶ Transfer digital recording to a PC
- ▶ Edit Recording
- ▶ Save as MP3 file

▶ **Walk through process and then demonstration**

Recording and Editing with Digital Media

► Process Flow:

Recording and Editing with Digital Media

- ▶ **Iphone -- Use Voice memo to record**
 - ▶ Moderate quality using internal microphone
 - ▶ Not Stereo!

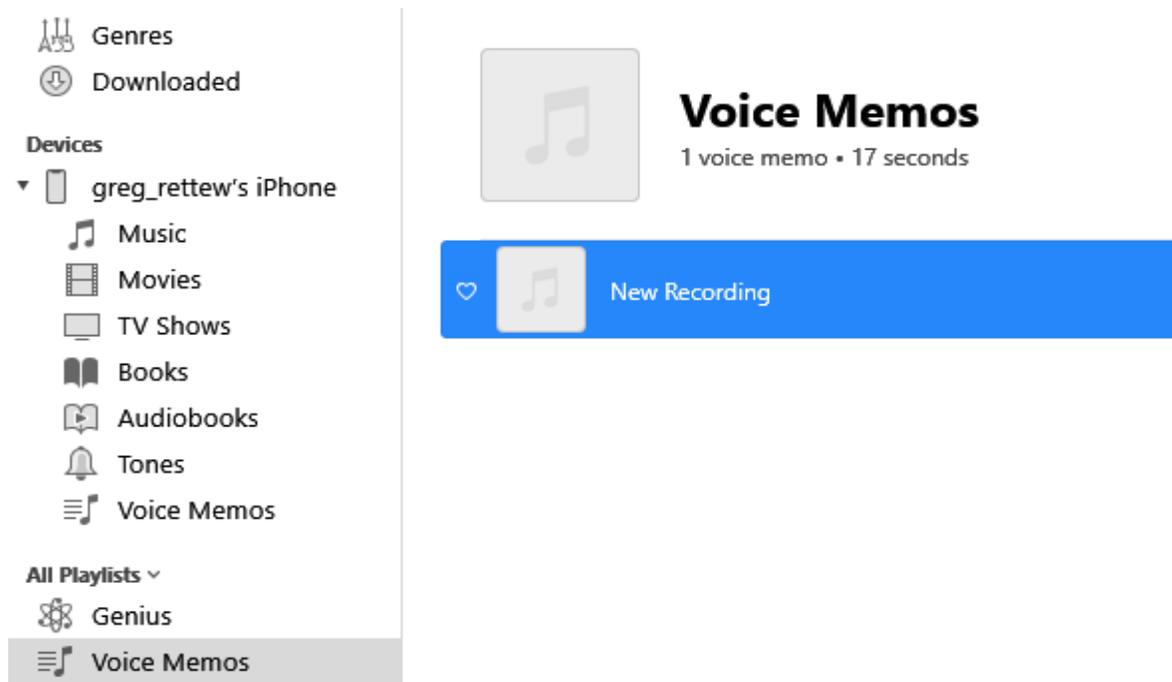

- ▶ **Itunes to transfer data to PC**
 - ▶ Hook up iphone to PC (via USB connection)
 - ▶ Run Itunes (make sure you can see the phone!)
 - ▶ Sync iphone in Itunes
 - ▶ Then voice memos available via All Playlists (Voice Memos)
 - ▶ Right click and copy, then paste into work directory

American Guild Of Organists

Recording and Editing with Digital Media

▶ Tascam DR100-mkiii PCM Recorder

- ▶ Costs \$300 (Amazon), \$20-100 for accessories
- ▶ Can record stereo at SA-CD quality (at near studio quality with internal mikes)
- ▶ Has internal Uni/Omni directional mikes
- ▶ Writes data onto SD card as .wav file (can also write an MP3 file directly as backup)

▶ Record - Transfer data:

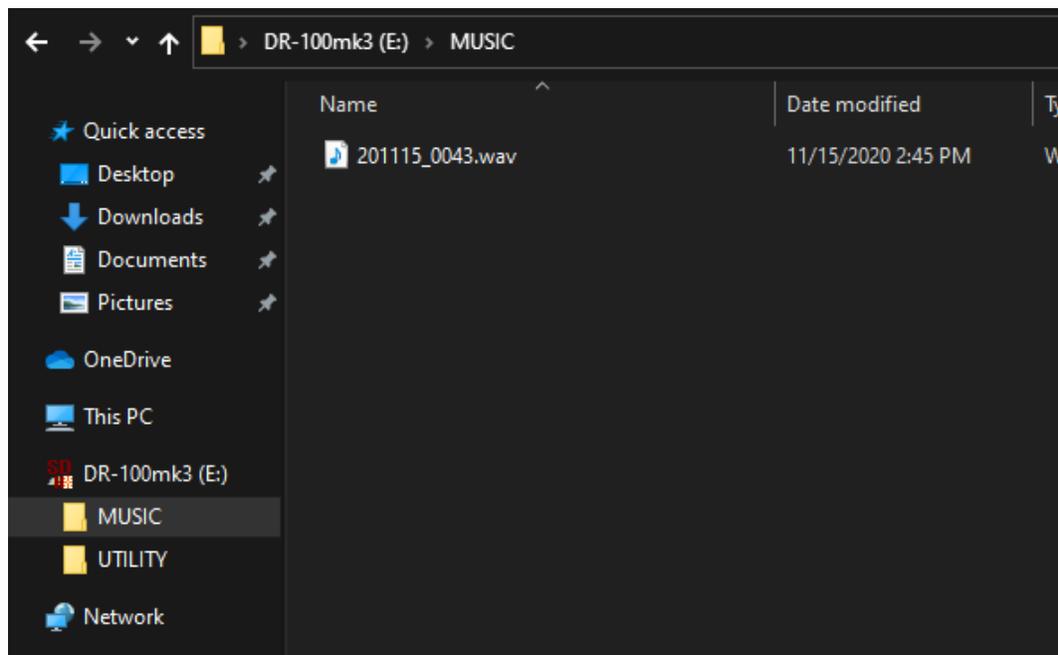

- ▶ To record - hit record button once for level check, again for record, then stop button to stop
- ▶ Turn recorder off after recording complete
- ▶ Remove SD card
- ▶ Insert into SD card reader (attached to PC - via USB port)
- ▶ Copy desired .wav file (from DR-100mkiii) drive to work directory

Recording and Editing with Digital Media

► Tascam Transfer Disk on PC

American Guild Of Organists
Technology Committee

Recording and Editing with Digital Media

- ▶ **Editing digital audio file**
- ▶ Use audacity
 - ▶ (can be found on the net by searching for best free audio editing software for windows)
 - ▶ Note: Apple m4a audio files may require additional driver downloads
- ▶ Clean up basic recording
 - ▶ Remove whitespace
 - ▶ Add Equalization (if desired)
 - ▶ Add reverb (if desired)
 - ▶ Listen / save

American Guild Of Organists
Technology Committee

Recording and Editing with Digital Media

- ▶ **Editing digital audio file (2)**
- ▶ Merge in voiceover audio file
 - ▶ Add new track (Tracks -> Add new -> Stereo track)
 - ▶ Open secondary audio file
 - ▶ Copy desired portion to new track
 - ▶ Align second track to desired start over primary track (Tracks -> align -> start to cursor/selection start)
 - ▶ Fine alignment requires use of start and end timers at bottom of screen
 - ▶ Bring Voiceover to forefront (View -> Mixer board ... adjust volume of voiceover)
 - ▶ Listen
 - ▶ Export as MP3 (Note! - this combines both streams into one stereo stream)

Recording and Editing with Digital Media

▶ General Recording/Editing considerations

▶ Levels

- ▶ Keep VU around -6 dB
 - ▶ At 0+ dB distortion starts (on digital recorders)
 - ▶ Level too low (-20 dB) allows amplifier noise, converter (non-linearity) artifacts, and creates poor sound stage

American Guild Of Organists
Technology Committee

Recording and Editing with Digital Media

- ▶ General Recording/Editing considerations (2)
- ▶ **Miking/Mike Placement**
 - ▶ Use Uni mikes for instruments, instrumental solos
 - ▶ Use Omni mikes for choral work
 - ▶ Place recorder close enough to get reasonable volume to mikes, but at the same time not so close that blend disappears
 - ▶ Microphone Technologies
 - ▶ Condenser, Dynamic, Ribbon
 - ▶ Dynamic most prevalent
 - ▶ Condenser more studio oriented for detail

American Guild Of Organists
Technology Committee

Recording and Editing with Digital Media

▶ Demonstration on PC

- ▶ Show transfer from Tascam to PC
- ▶ Cleanup audio file
- ▶ Add Voiceover to audio file
- ▶ Export as MP3

American Guild Of Organists
Technology Committee

Recording and Editing with Digital Media

▶ Video editing -- Basically the same process

- ▶ Good Video all about composition
- ▶ ¼ second black up, black down for start/stop
- ▶ Talking heads - need reasonable (not busy) background

- ▶ Editing Can be more involved - two streams (video/audio) - that are only synced at certain points - this is to facilitate multi lingual recordings
- ▶ Can produce curious results
- ▶ Generally need more computing horsepower for video editing

American Guild Of Organists
Technology Committee

Recording and Editing with Digital Media

▶ Concluding Remarks

- ▶ Keep software and hardware up to date
- ▶ Good Luck in your recordings
- ▶ Let me know if you have questions
